	PASSATOIA A ROTOLO - L_NICO		PVC	PSV MixEco			
	Recycled total	Post-consumer recycled	Pre-consumer recycled	By-product total	External by-product	Internal by-product	Virgin material
	40%	—	40%	—	—	—	60%
	Dimension	MODULO A ROTOLO: 1000 x 2500 x 18 MM					
	Description	NICO è la passatoia in rotolo più richiesta dai gestori di stabilimenti balneari italiani: grazie alla struttura flessibile senza sottostruttura rigida, si srotola direttamente sulla sabbia o sui ciottoli, adattandosi a percorsi irregolari e pendenze. I rotoli arrivano già montati e si collegano tra loro con corda in poliestere o fascette in plastica, senza limiti di lunghezza: puoi creare camminamenti di qualsiasi estensione semplicemente agganciando un modulo all'altro. Il materiale WPVC non si surriscalda al sole, non trattiene sabbia e può arrivare fino al bagnasciuga. Installazione in pochi minuti, rimozione a fine stagione altrettanto rapida. Grazie alla superficie continua senza fessure tra le doghe, NICO è particolarmente indicata anche per il transito di carrozzine, deambulatori e passeggini. BIANCA - BEIGE - MARRONE - PASTELLO

	PASSATOIA RIGIDA AD INCASTRO - L_TOMMY - L_BIGTOMMY	PVC	PSV MixEco				
	Recycled total	Post-consumer recycled	Pre-consumer recycled	By-product total	External by-product	Internal by-product	Virgin material
	40%	—	40%	—	—	—	60%
	Dimension	MODULO RIGIDO: 1000 x 1100 x 58 MM1000 x 1100 x 80 MM					
	Description	TOMMY è la pedana a incastro bassa progettata per camminamenti pianeggianti ad alto traffico pedonale e piani doccia. I moduli si assemblano senza attrezzi grazie al sistema maschio-femmina e possono essere collegati tra loro senza limiti di lunghezza, creando una superficie continua, stabile e drenante. Ideale per le zone servizi dello stabilimento: docce, spogliatoi, corridoi tra le file di ombrelloni. La struttura sottostante in profili 70/18 mm garantisce robustezza anche sotto il peso di carrelli portavivande o attrezzature da spiaggia. BIANCA - BEIGE - MARRONE - PASTELLO
